

HAVE YOU GOT A LARNER -JOHNSON® VALVE?
DOES IT NEED A HEALTH CHECK?

Larner -Johnson® valves have been manufactured and supplied throughout the world for over 100 years. They can be used in many applications, such as the main reservoir scour or supply valves, Inline flow control valves and float operated level control valves. They are of a strong robust cast iron construction and require minimum maintenance, but they do require an occasional health check. Blackhall Engineering Ltd acquired the intellectual property rights for the Larner-Johnson® Valve; we have records going back over 100 years of every Larner-Johnson® valve Manufactured in the UK. **Give us your details and we will find it.**

Blackhalls offer an on site health Check of your valve, both externally and internally using an endoscope camera with full video back up and technical report. If any problems are found the valve can be fully refurbished and brought back to an as new condition, or if beyond economical repair replaced with a new valve.
