

ON SITE CAMERA INSPECTION
HAVE A LOOK INSIDE AND TAKE OUT THE GUESS WORK!

There are times when a valve will not operate correctly, it may not have been operated for a number of years, it may be tight to operate or it may be jamming in a certain position: To strip or remove the valve may be impractical and costly. **WE CAN HELP.**

Blackhall's now offer an on site camera inspection service. This involves inserting an endoscope type camera only 6mm diameter into the valve and carrying out a full internal inspection, checking for build up of debris, damage and wear and tear on the component parts and internal casting integrity. The information is recorded and a fully documented video/CD is supplied along with a full written report outlining the findings and recommendations.

THE BENEFITS

- ❖ **Saves time and money**
- ❖ **Takes out the guess work**
- ❖ **Quick and easy to do**
- ❖ **Minimum disruption**
- ❖ **Piece of mind**
- ❖ **Video/CD back up**
- ❖ **High definition pictures**
- ❖ **Identifies the problem instantly**
